Subject: HOTSITE REPORT: Water Emergency in Louisa County, VA

Louisa County, VA requested assistance from OSC Christine Wagner concerning flammable gases in their drinking water. The Town of Louisa issued a DO NOT USE NOTICE to customers of the Louisa County Water Authority (LCWA) via reverse 911.

The water treatment plant is unsure if the gases are in their source water or are somehow infiltrating into the water distribution system. OSC Wagner has been asked to assist in finding the source of the gas and to determine the impacted service area. She is coordinating her actions with VADEQ and VADEM, who are also responding.

Patti-Kay Wisniewski from WPD has been contacted and she has reached out to OSC Wagner. Patti-Kay is coordinating with VADOH who have been delegated the drinking water program. Patti-Kay stated that she can also reach out to EPA's Cincinnati office for technical assistance, if needed.
